```javascript
        // Successful post
        const result = await response.json();
        alert('Post added successfully!');
        document.getElementById('postForm').reset();
        fetchData(channelId);
    } catch (error) {
        // Present alert on error from backend
        console.error('Error adding post:', error);
        alert('Error adding post: ' + error.message);
    }
});
```
